Full Stack Developer with 2 years of experience creating interactive user experience via web applications. Currently working for Beadcore InfoTech Pvt. Ltd, Noida.

Work Experience

ATTENDANCE MANAGEMENT SYSTEM

At Beadcore InfoTech Pvt. Ltd. (Nov 2019 – Current)

- An application to manage the attendance of employees in a company via facial recognition. Worked predominantly on admin panel for records management and reports.
- Tech. Stack – Angular 7.0, Bootstrap, NodeJS, Express and MySQL

POLICE RECORDS

At Beadcore InfoTech Pvt. Ltd. (Nov 2019 – Current)

- An application to manage criminal records and missing/found people. Use of facial recognition to potentially match a suspect with existing records or a lost child to missing/found record. Worked predominantly on admin panel for records management.
- Tech. Stack – Angular 7.0, MaterializeCSS, NodeJS, Express and MySQL.

PERSONAL PROJECTS

- **Autter - Messaging App:** A messaging web application made on Angular. The web-client is integrated with ejabberd XMPP server for message exchange over web-sockets.
  Tech. Stack – Angular 10.2, Bootstrap, NestJS, Express, MySQL, eJabberd and Docker.
- **Developer Blog:** Personal developer blog over Hashnode. I publish articles from time to time, documenting my learning journey.
- **Portfolio:** A single page web app to showcase my work and experience. Currently deployed on heroku and Github Pages.
  Tech. Stack – Angular 10.2, Bootstrap, NestJS, Express and Docker.
